

Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur 440033

Scheme and Syllabus for
Bachelor of Technology in Computer Science & Engineering (Data Science)

Submitted by

Board of Studies in CSE/CT/IT/CE Engineering

Vision:

To nurture the students with current technology, research and ethics to become a prolific contributor having a great perspective to meet the developing needs of IT industry and society.

Mission:

- To empower the emerging graduates with high quality technical and value based education.
- To attain professional excellence in the field of Data Science and related areas.
- To encourage learners to carry research activities for addressing the social needs of the society.

Program Educational Objectives: (PEOs)

Data Science Graduate able to

- Apply his core competency to identify, formulate, analyze, design & implement the IT related problems with their sustainable solutions and contribute in the profession with elevated ethics.
- Solve problems of social relevance applying the knowledge of data science and pursue higher education and research.
- Work effectively as Individual and Team member in multidisciplinary projects.
- Engage in lifelong learning career enhancement and adopt to changing professional and societal needs.

PROGRAM SPECIFIC OUTCOMES : (PSOs)

- An ability to apply mathematical foundations, algorithmic principles and data science theory in the modeling and design of software systems of varying complexity.
- An ability to work with Open Source Software and use off the shelf utilities for program integration.

Program Outcomes

PO1: Engineering Knowledge::Apply the knowledge of mathematics, science, engineering fundamentals, and engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis: Identify, formulate and analyze hardware and software engineering problems and arrive at substantiated conclusions using first principles of mathematics, natural and engineering sciences.

PO3. Design/Development of solutions: Design and develop hardware / software system to meet desired needs within realistic constraints related to economic, environmental, social, political, ethical, health and safety, verifiability, and sustainability concerns.

PO4. Conduct investigations of complex problems: Use research based knowledge including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.

PO5. Modern tool usage: Use techniques, skills, and modern computer engineering tools, including simulation and modeling, for addressing the needs of engineering profession and interdisciplinary business.

PO6. The engineer and society: Understand the computing needs of inter-disciplinary scientific and engineering disciplines and design and develop algorithms and techniques for societal, health, safety, legal and cultural problems.

PO7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

PO8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9. Individual and team work: Function as member or leader of team and to understand engineering management principles & finance to manage projects in multidisciplinary environment.

PO10. Communications:

Effectively transfer technology to engineering community and society at large on broadly defined engineering needs through technical reports, presentations and software technologies.

PO11. Project management and finance:

Demonstrate knowledge and understanding of engineering and management principles and apply these to one's own work, as a member and leader in a team. Manage projects in multidisciplinary environments.

PO12. Life-long learning: Engage in life long learning and adapt to rapid changes in computer science & allied areas.

_ _

CREDIT FRAMEWORK STRUCTURE

Semester		I	II	Ш	IV	V	VI	VII	VIII	Total Credits

First Semester B. Tech. (Computer Science & Engineering/ Computer Engineering/ Information Technology/ Computer Technology/Computer Science & Engineering (Data Science))

Essentials of Chemistry (TH+P)		
Total Credits: 02 T + 01 P	Subject Code: BCB1T01	
Teaching Scheme :	Examination Scheme :	
Lectures: 2 Hours/Week	Duration of University Exam: 03 Hrs.	
Tutorials: 0 Hours/Week	College Assessment: 30 Marks	
Practical: 02 Hours/Week	University Assessment:70 Marks	

	Course Objectives			
1	To introduce ideas of electrochemistry necessary to understand the function of batteries.			
2	To gain an understanding of the rare earth metals and waste handling generated out of their uses.			

	Course Outcomes				
After	After completion of syllabus, students would be able to				
1	Students will be able to utilize the basics concepts of battery technology & energy storage devices.				
2	Students will learn about rare earth elements, the correct disposal methods of e-wastes and while creating any tool they will keep this environmental aspect in mind.				
3	They will know the role of nanomaterials and their applications.				
4	Students will inculcate the use of instrumentation techniques and interpret its applications in material characterization.				

SYLLABUS FYUG Engineering Curriculum: NE

Details of Topic		otment of ours	Mapped with CO Number
	L	T/A	CO
UNIT 1: Battery Technology			
Electrochemical & Galvanic Series, Electrochemical & Electrolytic	6		
cells Battery: Introduction, types-primary, secondary and reserve,			
Lithium-cobalt oxide and metal air batteries - characteristics,			
components/materials, working and applications.			
Super capacitors: Introduction, types (EDLC, pseudo and			1
asymmetric capacitor) with examples and applications.			
Energy conversion devices: Introduction, characteristics,			
materials, working and applications of H2-O2 fuel cells, amorphous			
Si and quantum dye sensitized solar cells.			
UNIT 2: Rare earth elements and E-wastes management			
Rare earth elements: Properties, applications in electronics.	6		2

Lanthanide contraction. Types of E-wastes, environmental and health		
risks, segregation and recycling (Hydrometallurgical,		
pyrometallurgical and direct recycling), Extraction of rare earth and		
precious metals from e-wastes,		
Twelve principles of Green Chemistry. Green Computing, Role of		
Green Computing in Environment and Research, Green devices and		
Green data Servers.		
UNIT 3: Nonmaterial's		
Introduction, classification, size dependent properties, surface area,	6	
optical and catalytic properties, Synthesis methods of nanomaterials-		
Top down and bottom-up approach. Carbon nanomaterials: Types,		3
properties and applications of CNT and graphene. Applications of		
nano materials.		
UNIT 4: Material Characterization Techniques		
Principles and applications of –	6	
Electronic Spectroscopy (Beer-Lambert's law and its numerical),		
Infra-Red spectroscopy and Nuclear Magnetic Resonance		
spectroscopy.		
Thermal analysis (Thermogravimetry, Differential Thermal Analysis,		
Differential Scanning Calorimetry), Scanning Electron Microscopy,		4
Transmission Electron Microscopy, Atomic Force Microscopy,		
Brunauer-Emmett-Teller (BET) surface area analysis, X-ray		
Diffraction Analysis, particle size analyser (Dynamic Light		
Scattering), High Performance Liquid Chromatography and Gas		
Chromatography

Lectures: 3 Hours/Week	Duration of University Exam: 03 Hrs.	
Tutorials: 0 Hours/Week	College Assessment: 30 Marks	
	University Assessment:70 Marks	

	Course Objectives			
1	The aim of this course is to acquaint aspiring engineers with methods in differential, integral, and linear algebra.			
2	It seeks to provide students with common concepts and resources that will enable them to manage mathematics and its applications with ease and become proficient in their field.			

	Course Outcomes		
After	After completion of syllabus, students would be able to		
1	To apply knowledge of matrices and linear algebra in a comprehensive manner		
2	To exhibit knowledge of the fundamental concepts of linear algebra, such as inner product space, bases and dimensions, vector space, subspace, linear transformations, and inner product space.		
3	To solve engineering problem by using knowledge of differentiation.		
4	To analyze length, area, volume using knowledge of curve tracing.		
5	To evaluate series and sequences based on their convergence and type.		

SYLLABUS

Details of Topic		otment urs	Mapped gwith iculu CO Number	m: NEP
	L	T/A	CO	
UNIT I :Linear Algebra I				
Linear dependence of vectors, Eigen values and Eigen vectors,	7			
Reduction to diagonal form, Largest Eigen value and its			1	
corresponding Eigen vector by iteration method, Gaussian			1	
elimination, LU Decomposition (Crout's method).				
UNIT II : Linear Algebra II				
Vector Space; Subspaces; Basis; Dimension; Linear transformation;	7			
Range Space and Rank; Null Space and Nullity; Rank nullity				
theorem, Matrix Representation of a linear transformation;			2	
Inner Product Spaces: Norm; Orthonormal Sets, Positive definite				
matrices, Singular Value Decomposition, Gram-Schmidt process.				
UNIT III : Differential Calculus				
Successive differentiation: Leibnitz's Rule, Taylor's and Maclaurin's	7		3	
series for function of one variable, Indeterminate forms and			3	

L'Hospital's Rule, Maxima and Minima for function of one variable, continuity of functions; differentiability, Rolle's theorem, Mean value		
theorem.		
UNIT IV : Integral Calculus		
Beta and Gamma functions and their properties. Curve Tracing: Tracing of curves (Cartesian), Applications of definite integrals to find length of the curve, area, volume & surface area of revolution.	8	4
UNIT V :Sequence and Series	7	
Sequence, types of sequence, test of convergence of sequences,		5
Cauchy sequence, infinite series, power series, Alternating series,		3
tests of convergence and absolute convergence of series.

Problem Solving using 'C'		
Total Credits: 03 T	Subject Code: BCB1T03	
Teaching Scheme:	Examination Scheme :	
Lectures: 3 Hours/Week	Duration of University Exam: 03 Hrs.	
Tutorials: 0 Hours/Week	College Assessment: 30 Marks	
Practical: 02 Hours/Week	University Assessment:70 Marks	

	Course Objectives		
1	Design solutions to simple engineering problem by applying the basic programming principles of C language and basic mathematical knowledge.		
2	Develop simple C programs to illustrate the applications of different data types such as arrays, pointers, functions.		

Course Outcomes			
After completion of syllabus, students would be able to			
1	Illustrate and explain the basic computer concepts and programming principles of C language.		
2	Develop C programs to solve simple mathematical and decision making problems.		
3	Develop C programs to solve simple engineering problems using looping constructs.		
4	Develop C programs to demonstrate the applications of derived data types such as arrays, pointers, strings and functions.		
5	Use and create functions for modular programming		

SYLLABUS

SYLLABUS				
Details of Topic	t of	otmen µnserin	Mappe d with CO Numbelu r	m: NI
	L	T/A	CO	
UNIT I:				
UNIT I:	7			
Introduction to Programming: Importance of C, Basic Structure of C				
Programs, Programming Style, Executing a C Program.				
Constants, Variables, and Data Types: Introduction ,Character Set ,C				
Tokens, Keyword sand Identifiers Constants, Variables, Data Types				
,Declaration of Variables, Assigning Values to Variables, Defining Symbolic Constants				
Managing Input and Output Operations: Reading a Character, Writing a			1	
Character, Formatted Input, Formatted Output.			1	
Operators and Expressions: Introduction, Arithmetic Operators, Relational				
Operators ,Logical Operators, Assignment Operators, Increment and				
Decrement Operators, Conditional Operator, Bitwise Operators, Special				
Operators, Arithmetic Expressions, Evaluation of Expressions, Precedence of				
Arithmetic Operators, Type Conversions in Expressions, Operator				
Precedence and Associativity.				

UNIT II:		
Decision Making and Branching: Introduction, Decision Making with IF Statement, Simple IF Statement, the IFELSE Statement, Nesting of IFELSE Statements, The ELSE IF Ladder, The Switch statement. Decision Making and Looping: The WHILE Statement, The DO Statement, the FOR Statement, Jumps in LOOPS.	7	2
UNIT III:		
Arrays: One-dimensional Arrays, Declaration of One-dimensional Arrays, Initialization of One-dimensional Arrays, Example programs- Linear search, Binary search, Bubble sort, Selection sort. Two-dimensional Arrays, Declaration of Two-dimensional Arrays, Initialization of Two-dimensional Arrays, Example programs — Matrix Multiplication, Transpose of a matrix.	7	3
UNIT IV:		
Character Arrays and Strings: Declaring and Initializing String Variables, Reading Strings from Terminal ,Writing Strings to Screen ,Arithmetic Operations on Characters, String-handling Functions (strlen(), strcpy(), strcmp(), strcat(), strrev()), Example Programs(with and without using built-in string functions), Two-dimensional character arrays.Pointers: Introduction,DeclaringPointerVariables,InitializationofPointervariables,acces sing a Variable through its Pointer, Pointer Expressions, Pointer Increments and ScaleFactor,Pointers and 1-D Arrays.	8	4
UNIT V:	7	5
User-defined Functions: Elements of User-defined Functions, Definition of Functions, Return Values and their Types, Function Calls, Function Declaration, Category of Functions, No Arguments and no Return Values, Arguments but no Return values, Arguments with Return Values, No Arguments but Returns a Value, Passing Arrays to Functions. Recursion - Factorial of an integer, Xn, Finding nth Fibonacci numbers.

Problem Solving using 'C'		
Total Credits: 01	Subject Code: BCB1P03	
Teaching Scheme:	Examination Scheme :	
Lectures: 2 Hours/Week	Duration of University Exam: 03 Hrs.	
Tutorials: 0 Hours/Week	College Assessment: 25 Marks	
Practical: 02 Hours/Week	University Assessment:25 Marks	

The laboratory programs should be executed on CodeBlocks IDE using GCC Compiler.(Select any 10 Experiments)

	Course Objectives		
1	Understand the basic principles of C programming language.		
2	Develop C programming skills.		
3	Develop debugging skills using Code Blocks IDE.		

	Course Outcomes			
After	After completion of syllabus, students would be able to			
1	Develop, Debug and Execute programs to demonstrate decision making and looping constructs in.			
2	Develop, Debug and Execute programs to demonstrate the applications of arrays in C.			
3	Develop, Debug and Execute programs to demonstrate the applications of functions in C.			
4	Develop, Debug and Execute programs to demonstrate the basic concepts of pointers in C.			

Laboratory Programs:

- 1. Develop a C Program to find the roots of quadratic equation for non-zero co- efficient using if-else
- 2. ladder construct.

- FYUG Engineering Curriculum: NEP
- 3. Develop a C Program to conduct Binary search for a key element over an array of n
- 4. integer elements. Report success or failure with appropriate messages.
- 5. Develop a C Program to implement a simple calculator to perform addition, subtraction,
- 6. multiplication and division operations using switch construct. Display appropriate messages for
- 7. invalid operator and divide by zero error.
- 8. Develop a C program to read n elements into an integer array and sort the array using Bubble sort
- 9. technique. Print the input array and the resultant array with suitable messages.
- 10. Develop a C Program to generate the Prime numbers between the ranges m & n
- 11. using nested for loop construct. Also, print the number of prime numbers generated.
- 12. Develop a recursive C function to find the factorial of a number, n!, defined by fact(n)=1, if n=0.
- 13. Otherwise fact(n)=n*fact(n-1). Using this function, develop a C program to compute the Binomial
- 14. coefficient nCr. Perform input validation as well.

- 15. Develop a C Program to find the GCD & LCM of two integers using Euclid's algorithm.
- 16. Develop a C program to find the smallest and largest elements in an array using pointers and then
- 17. swap these elements and display the resultant array.
- 18. Develop a C program to find the Sine of an angle for the given n terms using the series Sin(x) = x -
- 19. x3/3! + x5/5! n terms.
- 20. Develop a C program to read two matrices A (m x n) and B (p x q) and compute the product of the
- 21. two matrices. Print both the input matrices and resultant matrix with suitable headings and output
- 22. should be in matrix format only. Program must check the compatibility of orders of the matrices
- 23. for multiplication. Report appropriate message in case of incompatibility.
 - . Develop a C program to find the sum of all the elements of an integer array using pointers.
- 24. . Develop a C program to accept a matrix of order m x n. Implement the following functions: Find the sum of each row

Find the sum of each column

The sum should be printed in main function only.

- 25. Develop a C program to count the vowels & consonants in a given string.
- 26. Develop a C program to perform the following operations using functions:
- 27. Read n elements into an array, Print the contents of an array
- 28. Sort an array of n elements using Selection sort technique

Basics of Electronics Engineering		
Total Credits: 03 T	Subject Code : BCB1T04	
Teaching Scheme:	Examination Scheme :	
Lectures: 3 Hours/Week	Duration of University Exam : 03 Hrs.	
Tutorials: 0 Hours/Week	College Assessment: 30 Marks	
	University Assessment:70 Marks	

	Course Objectives				
1	To make students understand about Semiconductor devices & its applications, Digital gates, flip-flops, counter and design of simple digital circuit, Microcontroller & its applications.				
2	Introduce embedded system and IoT, Analog, digital communication and wireless communication				

Course Outcomes			
After	After completion of syllabus, students would be able to		
1	Explain the working of semiconductor devices		
2	Select best circuit for the given specifications/application.		
3	Analyse, design and implement Combinational and Sequential Circuits.		
4	Select sensors for specific applications.		
4	To design and implement Microcontroller based systems.		
5	To understand the fundamental concepts of electronic communication and their use in		
	computer applications.

Practical: 04 Hours/Week	University Assessment:50 Marks		

	Course Objectives			
1	Students will learn how to create visually appealing and user-friendly websites using a combination of HTML, CSS, and other web technologies.			
2	Topics include web development tools, responsive design, accessibility, and best practices for creating modern websites.			

	Course Outcomes	
After	completion of syllabus, students would be able to FYUG Engineering Curriculum	: NEP
1 Understand the fundamentals of Internet, and the principles of web design.		
2 Construct basic websites using HTML and Cascading Style Sheets.		
Build dynamic web pages with validation using Java Script objects and by applying		
3	different event handling mechanisms.	
4	Develop modern interactive web applications and deploy.	

Course Outcomes: After Completing this course students will be able to

1. HTML (Hypertext Markup Language)

- Basic HTML Structure
- Text Formatting and Semantic Elements
- Lists and Links
- Forms and Input Elements

2. CSS (Cascading Style Sheets)

- Introduction to CSS
- Selectors and Properties
- Layout and Positioning

- CSS Box Model
- 3. Responsive Web Design
- Media Queries
- Fluid Layouts
- Flexbox and Grid Layout
- Mobile-First Design

4: Web Typography

- Font Families and Styles
- Web Fonts and Icons
- Typography Best Practices

5: Images and Multimedia

- Image Formats and Optimization
- Working with Images in HTML and CSS
- Embedding Audio and Video

6: Web Accessibility

- Accessibility Principles and Guidelines
- ARIA Roles and Attributes
- Testing for Accessibility
- Designing for All Users

7: Web Development Tools

- Text Editors and Integrated Development Environments (IDEs)
- Version Control with Git and GitHub
- Browser Developer Tools
- Debugging and Testing

8 : Advanced Topics

- CSS Preprocessors (e.g., Sass)
- JavaScript Basics
- Introduction to Content Management Systems (CMS)
- Web Hosting and Deployment

	Community Based P	articipatory Research	
Course Code:	BCC1P01	Credits:	02
Teaching Hours / Week	04 P	SEE	100 M
Total number of 60 Course Category CC/LL teaching hours			
BoS	AS&H / Branch		

Course Outcome:

- Gain an understanding of rural life, Indian culture and ethos and social realities
- Develop a sense of empathy and bonds of mutuality with the local community
- Appreciate significant contributions of local communities to Indian society and economy
- Learn to value the local knowledge and wisdom of the community
- Identify opportunities for contributing to community's socio-economic improvements.

Unit – I

Appreciation of Rural Society:

Rural lifestyle, rural society, caste and gender relations, rural values with respect to community, nature and resources, elaboration of "soul of India lies in villages' (Gandhi), rural infrastructure. Task to perform - Prepare a map (physical, visual or digital) of the village you visited and write an essay about interfamily relations in that village. – Classroom discussions – Field visit** – Assignment Map

Unit – II

Understanding rural and local economy and livelihood:

Agriculture, farming, land ownership, water management, animal husbandry, non-farm livelihoods and artisans, rural entrepreneurs, rural markets, migrant labour.

Task to perform - Describe your analysis of the rural house hold economy, its challenges and possible pathways to address. Circular economy and migration patterns. - Field visit** - Group discussions in class - Assignment

Unit – III

Rural and local Institutions:

Rural and local Institutions:FYUG Engineering Curriculum: NEP Traditional rural and community organisations, Self-help Groups, Panchayati raj institutions (Gram Sabha, Gram Panchayat, Standing Committees), Nagarpalikas and municipalities, local civil society, local administration.

Task to perform - How effectively are Panchayati Raj and Urban Local Bodies (ULBs) institutions functioning in the village? What would you suggest to improve their effectiveness? Present a case study (written or audio-visual). – Classroom – Field visit** – Group presentation of assignment

Unit - IV

Rural and National Development Programmes:

History of rural development and current national programmes in India: SarvaShikshaAbhiyan, BetiBachao, BetiPadhao, Ayushman Bharat, Swachh Bharat, PM Awaas Yojana, Skill India, Gram PanchayatDecentralised Planning, National Rural Livelihood Mission (NRLM), Mahatma Gandhi National Rural Employment Guarantee Act 2005 (MGNREGA), SHRAM, JalJeevan Mission, Scheme of Fund for Regeneration of Traditional Industries (SFURTI), AtmaNirbhar Bharat, etc **Task to perform** - Describe the benefits received and challenges faced in the delivery of one of these programmes in the local community; give suggestions about improving the implementation of the programme for the poor. Special focus on the urban informal sector and migrant households. – Classroom – Each student selects one program for field visit** – Written assignment

Assessment: Readings from e-content and reflections from field visits should be maintained by each student in a Field Diary. Participation in Field Visits should be allocated 30% marks; group field project should have 40% of total marks; presentation of field project findings to the community institution should have 30% of total marks.

** Recommended field-based practical activities:

- Interaction with Self Help Groups (SHGs) women members, and study their functions and challenges; planning for their skill-building and livelihood activities;
- Visit Mahatma Gandhi National. Rural Employment Guarantee Act 2005 (MGNREGS) project sites, interact with beneficiaries and interview functionaries at the work site;
- Field visit to Swachh Bharat project sites, conduct analysis and initiate problem-solving measures;
- Conduct Mission Antyodaya surveys to support under Gram Panchayat Development Plan (GPDP);
- Interactive community exercise with local leaders, panchayat functionaries, grass-root officials and local institutions regarding village development plan preparation and resource mobilization;
- Visit Rural Schools/mid-day meal centres, study academic and infrastructural resources, digital divide and gaps;
- Participate in Gram Sabha meetings, and study community participation;
- Associate with Social audit exercises at the Gram Panchayat level, and interact with programme beneficiaries:
- Visit to local Nagarpalika office and review schemes for urban informal workers and migrants;
- Attend Parent Teacher Association meetings, and interview school drop outs;
- Visit local Anganwadi Centre and observe the services being provided;
- Visit local NGOs, civil society organisations and interact with their staff and beneficiaries;
- Organize awareness programmes, health camps, Disability camps and cleanliness camps;
 Conduct soil health test, drinking water analysis, energy use and fuel efficiency surveys and building solar powered village;
- Raise understanding of people's impacts of climate change, building up community's disaster preparedness; 10 Guidelines for Fostering Social Responsibility & Community Engagement in Higher Education Institutions in India 2.0
- Organise orientation programmes for farmers regarding organic cultivation, rational use of irrigation and fertilizers, promotion of traditional species of crops and plants and awareness against stubble burning;
- Formation of committees for common property resource management, village pond maintenance and fishing;
- Identifying the small business ideas (handloom, handicraft, khadi, food products, etc.) for rural areas to make the people self-reliant.

Teaching and Learning Methods:

A large variety of methods of teaching must be deployed.

An ICT based online module needs to be prepared for self-paced learning by students for one credit which can be supplemented through discussions in the classroom.

Reading and classroom discussions, Participatory Research Methods and Tools, Community dialogues, Oral history, social and institutional mapping, interactions with elected panchayat leaders and government functionaries, Observation of Gram Sabha, Field visits to various village institutions (see Section -3 Implementation Strategy).

SECOND SEMESTER B.Tech.

(Computer Science & Engineering/ Computer Engineering/ Information Technology/ Computer Technology)

Mathematical foundation of Computer Science (TH)		
Total Credits: 03 T Subject Code: BCB2T05		
Teaching Scheme :	Examination Scheme :	
Lectures: 3 Hours/Week	Duration of University Exam : 03 Hrs.	
Tutorials: 0 Hours/Week College Assessment: 30 Marks		
	University Assessment:70 Marks	

	Course Objectives		
1	Develop mathematical and logical thinking for enhancing computational power of the students.		
2	Equipped the students with fundamental mathematical tools used in computer science.		
	Course Outcomes		
After	After completion of syllabus, students would be able to		
1	Define mathematical structures, relations, functions and use them to model real life situations.		
2	2 Apply the concept of sets & fuzzy logics in their computer domain.		
3	Interpret the data in mathematical form		
4	Analyze basic facts of algebraic structures.		
5	Implement the concept of counting principles.		

SYLLABUS

Details of Topic	of	otment urs	Mapped with CO Number	
FYL	JG J Er	g TA rin	g Cu CO culu	m: NEP
UNIT I: Relations and Functions				
Relations: Ordered pairs and n-tuples, Types of relations, Composite	8			
relation, Transitive closure of a relation, Partially ordered set, Hasse				
diagrams.			1	
Functions: Definition, Composition of functions, Types of functions,				
Characteristics function and its properties.				
UNIT II : Set Theory & Fuzzy Logic				
Sets: Review of sets, Types and operations on sets, Principle of	7			
mathematical induction,				
Fuzzy sets: Fuzzy sets and systems, Crisp set, Operations and			2	
combinations on Fuzzy sets, Relation between Crisp set and Fuzzy				
set, Fuzzy relations, Overview of Fuzzy logic and classical logic.				
UNIT III : Curve Fitting				
Fitting of a Curve by Method of Least Squares: Straight line y =	7			
$a+bx$, Second degree parabola $y = a+bx+cx^2$ and curves of the type y			3	
$= ae^{bx}$, $y = ab^x$ and $y = ax^b$, Coefficient of correlation and Lines of			3	
regression. Rank correlation.				

UNIT IV : Algebraic Structures		
Introduction, Algebraic Systems, Groups, properties of algebraic groups, Semi groups, Monoids, Subgroup.Lagrange's theorem,	8	
Cosets, Normal Subgroup, quotient group.Homomorphism,		4
Isomorphism of semigroupmonoid.		
UNIT V : ElementaryCombinatorics	7	5
Basics of counting techniques, Pigeonhole principle, Definition of generating functions and examples, Recurrence relations: definitions & examples, Solving Linear Recurrence Relations, Inclusion and Exclusion principle.

Essentials of Physics		
Total Credits: 03 T	Subject Code: BCB2T06	
Teaching Scheme :	Examination Scheme :	
Lectures: 3 Hours/Week	Duration of University Exam: 03 Hrs.	
Tutorials: 0 Hours/Week College Assessment: 30 Marks		
	University Assessment:70 Marks	

	Course Objectives
1	To introduce ideas of quantum mechanics necessary to understand the function of quantum computing
2	To gain an understanding of the total internal reflection in optical communication system

	Course Outcomes		
After	After completion of syllabus, students would be able to		
1	Learn the basic concepts of the dual nature of matter, differentiate between bits and qubits, and apply them to analyze various relevant phenomena in Quantum Computers and solve related numerical problems.		
2	Relate the basic idea of total internal reflection to the propagation of light in an optical fiber and make use of the fiber concepts to solve numerical problems and relate to applications in engineering		
3	Identify and explain different types of diodes, transistors, and their applications		
4	Find how to extend the basic concepts of motion of charged particles in electric magnetic fields to solve numerical problems and to relate to applications in electron optic devices and CRO		
5	Learn and explain nanoscience and its properties related to bulk materials		

SYLLABUS

Details of Topic	Allotmer 'UGofnginee Hours		Mapped with gCO Number	m: NEP
	L	T/A	CO	
UNIT I : Quantum Computing				
Introduction to bits and qubits. Difference in bits and qubits. Quantum	7			
entanglement, Brief introduction about quantum computers				
Concept of wave-particle duality, De-Broglie Hypothesis, Matter				
Waves, Davisson-Germer Experiment				
Concept of wave packets, Heisenberg Uncertainty Principle.			1	
Schrodinger wave equation (time dependent and time independent),				
Wave function Ψ , probability function, normalization condition,				
Eigen values, eigen function, Application to one dimensional infinite				
potential well.				
UNIT II : Optical fiber				
Structure of optical fiber, total internal reflection, modes of	7			
propagation, Graded index profile, Numerical aperture, classification			2	
of optical fiber, Acceptance angle and cone, attenuation and				
dispersion, fiberoptic communication system.				

		1	
UNIT III: Semiconductor Physics			
Classification of materials on the basis of band gap, conductivity,	7		
drift and diffusion current intrinsic and extrinsic semiconductors.			
Diode and types of diodes: PN junction, Zener diode, LED, Tunnel			3
diode, Photo diode, transistors, common base, common emitter			
configurations.			
UNIT IV: Electron optics			
Motion of electron in magnetic and electric field, Bethe's law,	8		
Electrostatic lens, Block diagram and functions of each part of CRT			4
and CRO, trigger circuit, time base circuit applications of CRO			
UNIT V : Nanotechnology			
Concept of nanotechnology, Top-down and bottom-up approach,	7		
comparison of properties of bulk and nanomaterials, sol gel and ball			_
mill process, special types of materials, Zeolite and Graphene,			5
applications of nanotechnology.

List of Experiments

- 1. Introduction to quantum computers.
- 2. Energy gap of semiconductor /thermistor.
- 3. Parameter extraction from V-I characteristics of PN junction diode.
- 4. Parameter extraction from V-I characteristics of Zener diode.
- 5. Parameter extraction from V-I characteristics of PNP/NPN transistor in CB and CE mode.
- 6. V-I Characteristics of Tunnel diode.
- 7. V-I Characteristics of Light Emitting Diodes/ Determination of Plank's constant by using LEDs.
- 8. Study of Diode rectification.
- 9. Study of Hall Effect and determination of Hall Voltage of given sample.
- 10. Variation of Hall coefficient (R_H) with temperature.
- 11. To study B-H curve and to find out the values of coercivity, retentivity and saturation magnetization of experimental material.
- 12. Determination of NA for optical fiber
- 13. Calibration of Time Base circuit of CRO and determination of AC , DC voltage & frequency of electrical signals using CRO.
- 14. To determine the number of lines per cm on a diffraction grating using LASER beam.
- 15. Virtual Lab: Experiment on the determination of the thickness of a thin foil using an air wedge arrangement.
- 16. Virtual Lab: Experiment on the determination of the refractive indices of the material corresponding to ordinary and extra ordinary rays.

Note:Performance of at least **six** experiments is compulsory in a semester.

Python Programming		
Total Credits: 03	Subject Code: BCB2T07	
Teaching Scheme :	Examination Scheme :	
Lectures: 3 Hours/Week	Duration of University Exam: 03 Hrs.	
Tutorials: 0 Hours/Week	College Assessment: 30 Marks	
	University Assessment:70 Marks	

	Course Objectives
1	This course is aimed at offering the fundamental concepts of Python scripting language to the students. It starts with the basics of Python programming and deals with lists, dictionaries, functions, exceptions and files.
2	The objective of this course is to enable the students to develop the applications using the concepts of Python.

	Course Outcomes	
After	After completion of syllabus, students would be able to	
1	Understand the basic terminology used in computer programming to write, compile and debug programs in Python programming language.	
2	Use different data types to design programs involving decisions, loops, and functions.	
3	Handle the exceptions which are raised during the execution of Python scripts.	
4	Handle data using tuples and dictionaries	
5	Implement files and classes in the Python programming environment.	

Details of Topic	Allo of Hou G <u>En</u>	otment urs sineerin	Mapped with CO Number g CO	m: NE
UNIT I: INSTALLATION, DATA TYPES AND INPUT/OUTPUT:		1/11		
Importance of Python, Installing Python in Windows & Ubuntu,	7			
Executing Python programs, Comments in Python, Internal working				
of Python, Python character set, Tokens, Python Core Data Types,			1	
The print () function, Assignment of values to variables, The input()				
function, The eval() function.				
UNIT II: OPERATORS AND CONTROL STATEMENTS:				
Operators- Arithmetic Operators, Operator precedence and	7			
Associativity, Bitwise operator, The compound assignment operator;				
Decision statements- Boolean operators, Boolean Expressions and			2	
Relational operators, Decision making statements; Loop Control			_	
Statements-while loop, range() function, for loop; break statement,				
continue statement				
UNIT III: FUNCTIONS AND LISTS				
Functions- Syntax and basics of a function, Use of a function,	7		2	
Parameters and arguments in a function, The local and global scope			3	
of a variable, The return statement, Recursive functions, The lambda				

function; Lists-Creating Lists, Accessing the elements of a List, List slicing, Python in-built functions for lists, List Comprehension, List Methods, Passing list to a function, Returning a list to function.		
UNIT IV: TUPLES, SETS AND DICTIONARIES Tuples - Creating tuples, tuple() function, Inbuilt functions for tuples, Indexing and Slicing, Operations on tuples, Passing variable length arguments to tuples, Sort tuples, Traverse tuples from a list, The zip() function, The Inverse zip(*) function; Sets - Creating sets, The set in and not in operator, The Python Set Class, Set operations; Dictionaries -Basics of Dictionaries, Creating a Dictionary, Adding and replacing values, Retrieving values, Formatting dictionaries, Deleting items, Comparing two dictionaries, Methods of dictionary class, Traversing dictionaries, Nested dictionaries, Traversing nested dictionaries.	8	4
UNIT V : FILES		
File Handling-Opening a file, Writing Text, Closing files, Writing numbers to a file, Reading Text, Reading numbers from a file, Appending data, seek() function	7	5

Linux and Shell Programming	
Total Credits: 02	Subject Code: BSE2P01
Teaching Scheme :	Examination Scheme :
Lectures: 0 Hours/Week	Duration of University Exam: 03 Hrs.
Tutorials: 0 Hours/Week	College Assessment: 50 Marks
Practical: 04 Hours/Week	University Assessment:50 Marks

- Learn Linux Commands required to execute below practical list
- Write a shell script to reverse a number
- Write a shell script to write your user name as banner & print it on the screen.
- Write a shell script called is dirs which just lists the directories in the current directory
- Write a shell script called see taking a file name, as arguments which uses is, if the file is a directory & more if file is otherwise
- Write a shell script, using command cp, which over writes a files or copies a file.
- Write a shell script that asks a user to type w word, in, then tells the user how long that word is.
- Write a shell script which appends line to the file. Both the file name and line name
 have to be specified to the script at the command line. Ensure that it runs the sh. shell
 script. Print the no of lines after you are done.
- Write a shell script that gives person's UID, tell you how many times that person has logged in.
- Write a shell script that takes UID as argument prints out the person's names Curriculum: NEP directory name, shell & group & other that person may belong to.
- Write a shell script that for mail merging. facility.

^{**}This is recommended list, to be changed every year by subject teacher

Wellness, traditional medicines and yoga				
Total Credits: 02 Subject Code : BIK2T01C				
Teaching Scheme :	Examination Scheme :			
Lectures: 0 Hours/Week Duration of University Exam: 03 Hrs.				
Tutorials: 0 Hours/Week College Assessment: 30 Marks				
Practical: 04 Hours/Week University Assessment:70 Marks				

Course Objective:

The course will enable engineering students to acquire the knowledge of richness of healthy lifestyle and strong heritage of yoga and Vedas in Indian traditional system.

Course Outcomes:

On successful completion of the course, the students will able to:

CO1: Understand the importance of a healthy lifestyle

CO2: Familiarize to manage stress and health consciousness about physical and mental health.

CO3: Appreciate the benefits of yoga and medicinal plant.

CO4: Identify the social changes in Indian society.

Unit1: Importance of health and wellness, Essential components of balanced diet for healthy living, Processed foods and unhealthy eating habits.

Unit 2:

Body systems and common diseases, Sedentary lifestyle and its risk of disease, Stress, anxiety, and depression, Factors affecting mental health.

Unit 3:

Importance and benefits of yoga, Purpose of yoga, traditional knowledge of medicinal plant, use of home available herbs and spices.

Unit 4:

Vedas and it types, Social change in Indian society, Social stratification and class conflicts.

Glimpses of ancient Science and Technology				
Total Credits: 02	Subject Code: BIK2T01C			
Teaching Scheme :	Examination Scheme :			
Lectures: 0 Hours/Week Duration of University Exam: 03 Hr				
Tutorials: 0 Hours/Week College Assessment: 30 Marks				
Practical: 04 Hours/Week University Assessment:70 Marks				

Course Objectives					
1	To provide the students with scientific foundation of Ancient Indian Knowledge System				
2	To create awareness about scientific heritage of the ancient civilization				

Course Outcomes						
After completion of syllabus, students would be able to						
1	To understand about great mathematicians and to help students to trace, identify, practice, and develop the significant Indian mathematics.					
2	To understand the concept of motion and its application in Indian ancient physics literature.					
3	To understand the concepts of basic chemical & metallurgical process of ancient and medieval India.
